

Future of Work

Learning, Skilling, Career Mobility.

Engaged employees deliver exceptional results. Gartner Future of Work reports pegs the cost of disengaged employees between \$450 and \$550 billion annually. The demands imposed on organizations by self-managed, autonomous, continuously-innovating knowledge workers in the age of globally distributed workforce are enormous. Knowledge workers are increasingly seen as capital assets with high acquisition costs with a culture and system to empower growth through ongoing development; resulting in outsized business impact.

Knowledge workers expect fantastic experiences from their employers. Starting with seamless onboarding, acquire knowledge and skills, develop expertise through up-skilling and re-skilling and a path to long-term fulfilling career; modern workers impose.

Learning

Keeping pace with the market, technology and innovation requires a continuous learning culture that perfects knowledge into skills. With a vast array of content providers, sources and expertise, managing the deluge of knowledge is a difficult task. Add on the short shelf-life and constant innovations and we have a debilitating tsunami of materials to work through. Professionals need the ability to conveniently learn relevant knowledge at the time of need and use. EdCast LXP provides a platform that empowers professionals to effortlessly learn in the flow of work.

Skilling

The average professional today will hold over twelve different roles across his or her career- representing a 3x increase in skill building compared to the last decade. Professionals and businesses know the importance of developing deep expertise for their professional and
